

I identify	Specify • Who are you? • Where are you? • Patient's name, age, gender and department
S situation	What is the problem/reason for contact? • I'm calling because... (describe) • I have observed major changes... (ABCDE) • I have measured the following values... (RR*, SpO₂%, pulse/heart rhythm, BP[^], capillary refill time, tp.#) • I have received test results...
B background	If it's urgent and/or you are concerned – speak up. Brief and relevant case history • Admission diagnosis and date • Previous illnesses of significance • Relevant problems and treatment/interventions to date • Allergies
A assessment	Assessment (of the situation and background) • I think the problem/reason for the patient's condition is related to (respiration, circulation, neurology). • I don't know what the problem is but the patient's condition has deteriorated. • The patient is unstable, we need to do something. • I am concerned.
R recommendation	Request specific advice and interventions, and clarify expectations • I suggest.../What interventions do you recommend? ◦ Immediate intervention ◦ Investigation/treatment ◦ How often should I... • When should I next make contact? When will you be here? • Confirm messages and interventions with a closed loop.

The table is an adapted version of ISBAR, based on various national and international models.

*RR = respiratory rate

αSpO₂ = peripheral capillary oxygen saturation

[^]BT = blood pressure

#tp. = temperature
